Performance Evaluation 32 (1998) 325

PERFORMANCE EVALUATION
An International Journal

Author Index Volume 32

(The issue number is given in front of the page numbers)

Asrin, M.M. and **F. Kamoun,** A transient discrete-time queueing analysis of the ATM multiplexer (3) 153–183

Bause, F. and **P. Buchholz,** Queueing Petri nets with product form solution (4) 265–299
Boucherie, R.J., Norton's equivalent for queueing networks comprised of quasireversible components linked by state-dependent routing (2) 83– 99
Bruneel, H., *see* Wittevrongel, S. (1) 35– 56
Buchholz, P., *see* Bause, F. (4) 265–299

Choi, B.D., G.U. Hwang, Y.W. Jung and **H. Chung,** The periodic Markov modulated batch Bernoulli process and its application to MPEG video traffic (4) 301–317
Choi, J.S., *see* Lee, J.W. (2) 137–149
Chung, H., *see* Choi, B.D. (4) 301–317

Georganas, N.D., *see* Tsybakov, B. (1) 57– 80

Haring, G., *see* Lüthi, J. (3) 185–215
Haverkort, B.R., Book Review (3) 231–233
Hwang, G.U., *see* Choi, B.D. (4) 301–317

Jung, Y.W., *see* Choi, B.D. (4) 301–317

Kamoun, F., *see* Asrin, M.M. (3) 153–183
Kshemkalyani, A. and **V. Mendiratta,** Conference report – 16th IEEE Symposium on Reliable Distributed Systems 22–24 October 1997, Durham, USA (3) 235–240

Lee, J.W., J.S. Choi and **C.K. Un,** Performance analysis of an input queueing ATM switch with two priority classes (2) 137–149
Lüthi, J. and **G. Haring,** Mean value analysis for queueing network models with intervals as input parameters (3) 185–215

Majumda, S. and **C.M. Woodside,** Robust bounds and throughput guarantees for closed multiclass queueing networks (2) 101–136
Mazumdar, R., *see* Sharma, V. (3) 217–230
Mendiratta, V., *see* Kshemkalyani, A. (3) 235–240

Puliafito, A., M. Scarpa and **K.S. Trivedi,** Petri nets with k simultaneously enabled generally distributed timed transitions (1) 1– 34

Scarpa, M., *see* Puliafito, A. (1) 1– 34
Sericola, B., Transient analysis of stochastic fluid models (4) 245–263
Sharma, V. and **R. Mazumdar,** Estimating traffic parameters in queueing systems with local information (3) 217–230

Trivedi, K.S., *see* Puliafito, A. (1) 1– 34
Tsybakov, B. and **N.D. Georganas,** Self-similar traffic and upper bounds to buffer-overflow probability in an ATM queue (1) 57– 80

Un, C.K., *see* Lee, J.W. (2) 137–149

Wittevrongel, S. and **H. Bruneel,** Correlation effects in ATM queues due to data format conversions (1) 35– 56
Woodside, C.M., *see* Majumda, S. (2) 101–136

PERFORMANCE EVALUATION
An International Journal

Subject Index to Volume 32

Aggregation 83, 265
Analytic modeling 185
Analytic study 35
ATM 245
ATM multiplexer 153
ATM switch 137
Autocorrelation 301

Balance equations 83
Blocking 83
Bounds for computer and communication system 101
Buffer content 245
Buffer contents and delay 35
Buffer loss 153

Communication networks 217

Decomposition 83
Discrete-time queueing model 35

Estimating traffic parameters 217

Fluid flow models 245

HOL priority 137

Local information 217

Markov modulated rate process 245
Markov regenerative processes 1
Mean delay 153
Mean value analysis 185
MEPG video traffic 301
Multiclass queueing networks 101

Network monitoring 217
Norton's theorem 83

On–off sources 153
Optimal reshaping of traffic 217
Overflow probability 57

Parameter intervals 185
Performance analysis 137
Performance and reliability modeling 1
Performance bounds 101
Performance evaluation 101
Performance guarantee 101
Periodic MMBBP 301
Periodicity 301
Preemptive priority queueing strategy 137
Product form solutions 265

Quasireversibility 83
Queue length 153
Queueing networks 265
Queueing Petri nets 265
Queueing systems 185

Self-similarity 57
State-dependent routing 83
Stochastic Petri nets 1, 265

Train arrivals 35
Transient analysis 245
Transient and steady-state analysis 1
Transient transform analysis 153

Upper bound 57

Variable-length messages 35

Workload uncertainties 185
